Representatives from Other Private-Sector Partners (to be recommended by the
Columbus Partnership)*

11:15 a.m.

Data for Smart Cities: Making sense of a connected world in motion

Welcome to the Internet of Things: cars, trucks, trains, street lights and bridges all have Internet connections. How do we make sense of this unprecedented amount of data to solve real challenges? Smart cities and a connected world will impact future travel and transportation design. How do we plan for the successful integration of the new age of connected automation with the existing roadway infrastructure and policies? New approaches will be necessary to tackle these challenges.

*Monali Shah, HERE
Doug Terry, Econolite*

12:30 p.m.

Lunch Keynote: The Vision of Smart Cities

*Confirmed Speaker:
Joseph Kopsler, President, moovel Global*
